Description: In April 1970, during the glory days of the Apollo space program, NASA sent Navy Captain Jim Lovell and two other astronauts on America's fifth mission to the moon. Only fifty-five hours into the flight of Apollo 13, disaster struck: a mysterious explosion rocked the ship, and soon its oxygen and power began draining away. Written with all the color...

Review: This book did not disappoint! It is a great complement to the movie, offers more details of course, but is still easy to follow. The technical verbiage, which is extensive, is not a detriment to the readers understanding, even for a layperson like myself. I only looked up one thing while reading this book (more info on gimbal lock and why that is such...
